

[BLACK].

Manu Nests – sculptural seating pods for the garden & home. Manu Nests are hand-made in basalt fibre, a once Top Secret polymer used for its versatility, strength and lightness by the Soviets in the aerospace industry. Ergonomically designed for comfort, the pods become luxuriously comfortable with the addition of a sumptuous high quality Sunbrella cushion, which are water-repellent and machine washable. Finished as standard in a durable black polyester gel coat, with other RAL colours available on request.
