STÅLMÖBLER

Made in Grythyttan

Console table L, 105 in white lacquered oak with hot galvanized base.

## Consideration for generations

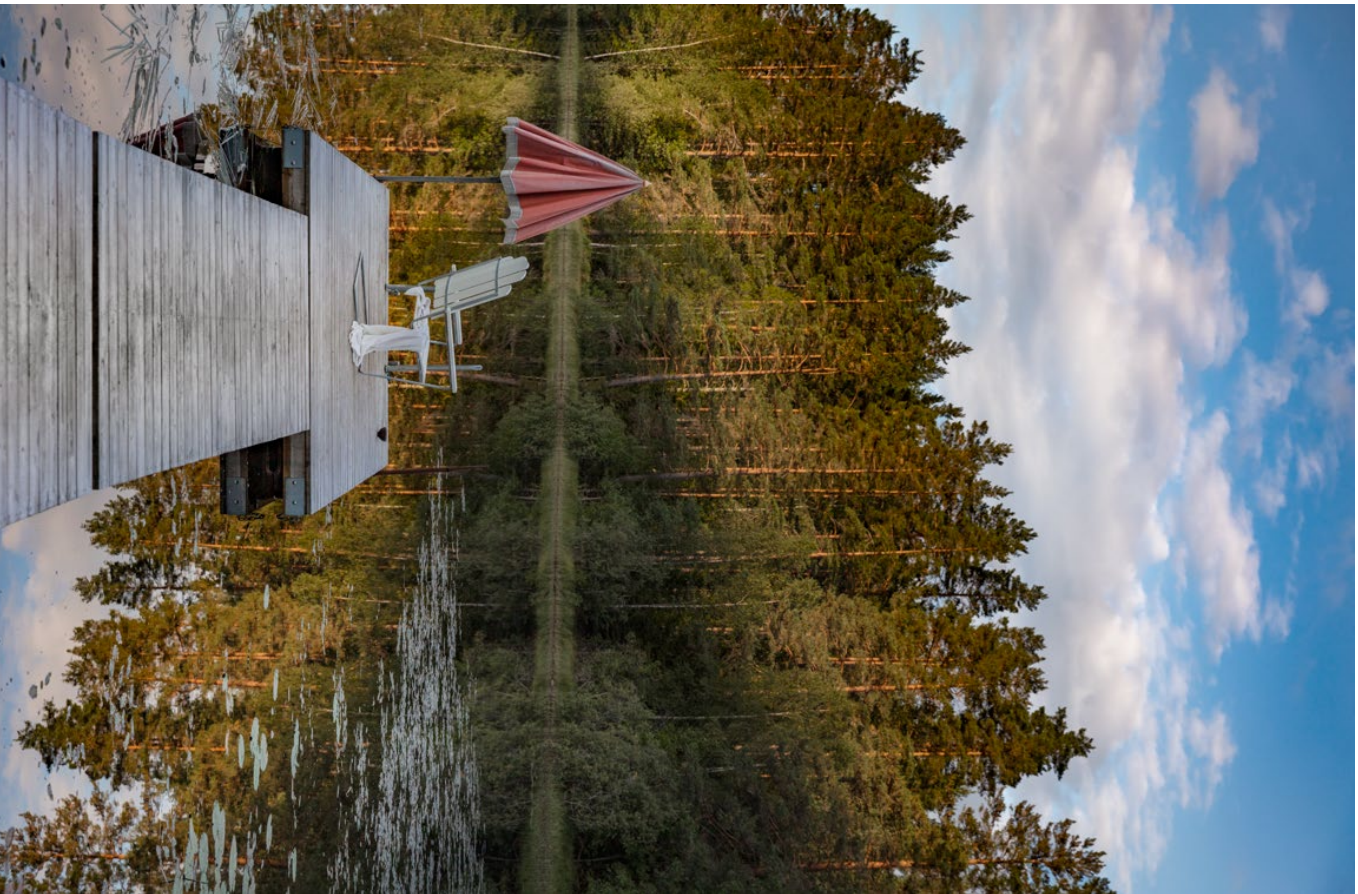

Grythyttan Slåmöbler is a story about the desire to create something enduring. We produce furniture made to last for years and generations, and this applies as much to our company and our hometown as it does to the whole wide world in which we all live and breathe. Consideration governs everything we do, and together we create values that endure.

Bench 5, white lacquered oak with hot galvanized base.

Armchair A2, Table 9A 120, white lacquered oak with hot galvanized base.  
SkatKøkken Gryfhytten.

Armchair A2 was designed by Artur Lindqvist for the 1930 Stockholm Exhibition. Today, it's a timeless classic that continues to point the way forwards. The consideration shown to even the smallest detail inspires us on our journey towards a more sustainable world. All wood is sourced from forests that are managed responsibly, and we manufacture the furniture at our factory in Bergslagen, just as we have always done.

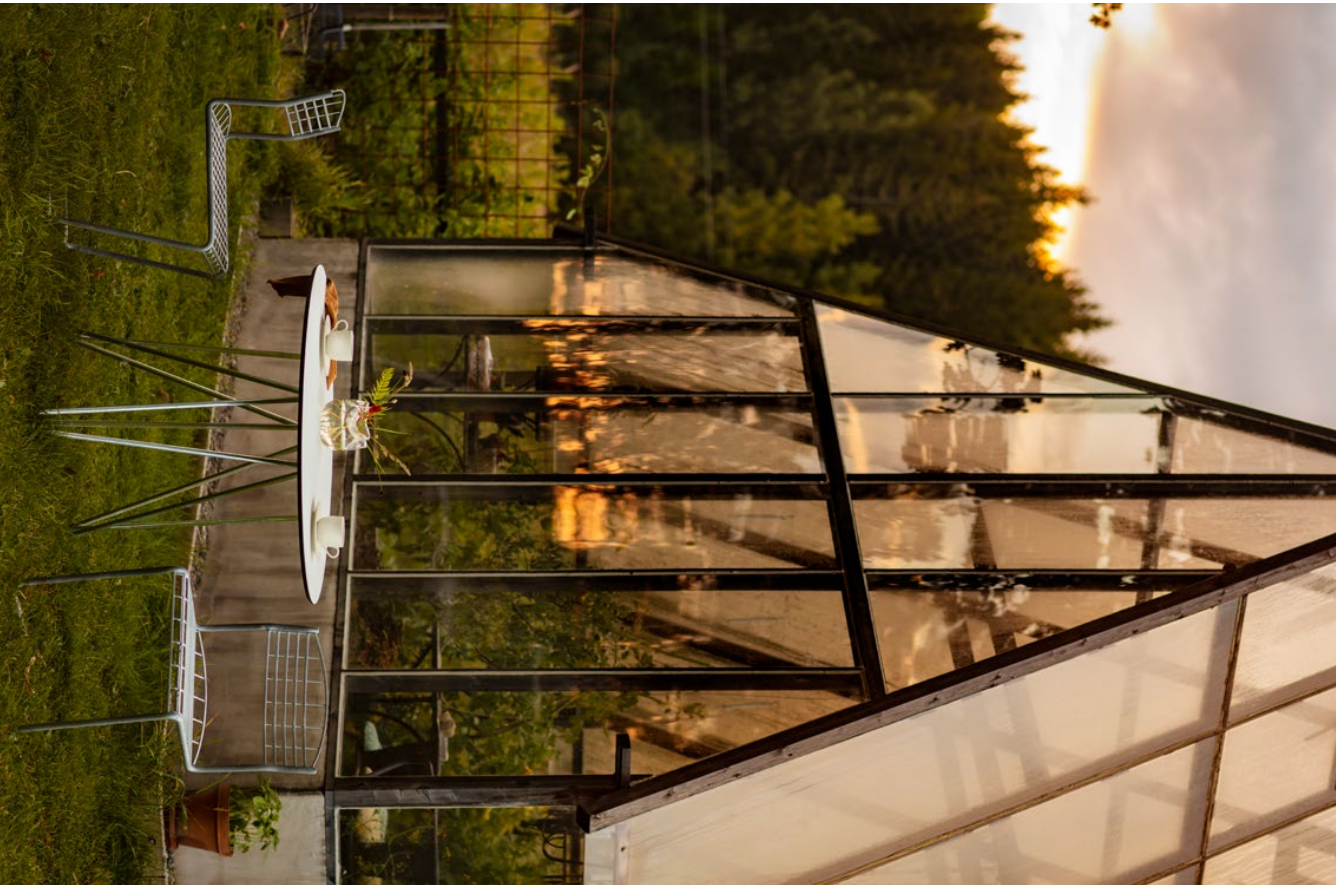

Chair 1, Table B30 84, white lacquered oak with hot galvanized base. SkatKøkken Gryfhytten.

## High Tech

Architect and designer Nisse Steinhilber transported us to a new age when he created the futuristic High Tech chair in 1984. Decades later, the design still feels remarkably bold and contemporary. The steel chairs and bases are available in a hot-galvanized or powder-coated finish and are equally well suited to indoor and outdoor use. The white tabletops in compact laminate are highly durable and built for a long and eventful lifetime.

Chair: High Tech, hot galvanized. Table: High Tech 60, hot galvanized with top in white compact laminate. Steinilber GbR/Fin.

Chair: High Tech, hot galvanized. Table: High Tech 60, hot galvanized with top in white compact laminate. Steinilber GbR/Fin.

# Pine of the right quality

Working with pine requires solid know-how and experience. However, once mastered, the results are without compare. To understand why the wood in our pine furniture ages so beautifully, and why it does not warp or crack over the years, take a look at the standing annual rings, which always run parallel to the short side.

Sofa 5, oiled pine with hot galvanized base, Gruvudden, Grythyttan.

Armchair 42 and Table 9A, oiled pine with hot galvanized base, Gruvudden, Grythyttan.

# Sit down and enjoy a cold one

Ever since brewery furniture first appeared in the beer houses of the late 1800s, it has become a natural part of beautiful parks and gardens throughout Sweden. Our own brewery series features hot-galvanized bases so that the furniture can handle those days of the year when the weather fails to entice anyone to enjoy their beer or coffee outdoors.

Brewery bench, Brewery chair and Brewery table 110, white lacquered oak with hot galvanized bases. Gästgärdet, Grytnäs.

Brewery bench in white lacquered oak with hot galvanized bases. Skatviken, Grytnäs.

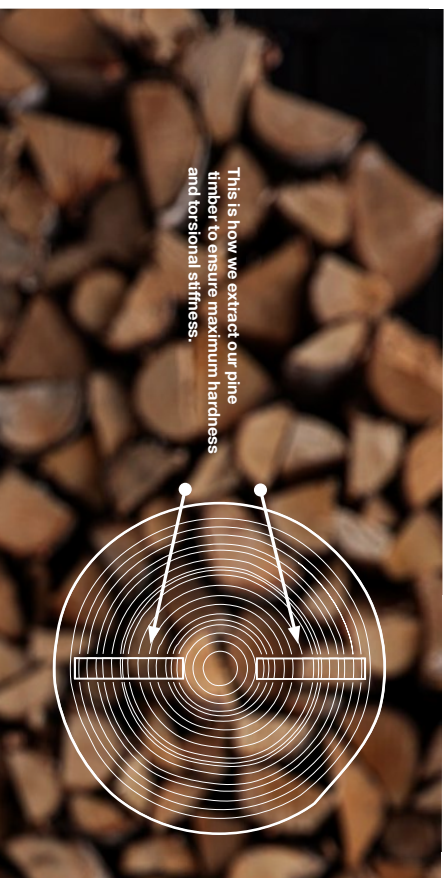

Brewery chair and Brewery tripod table in white lacquered oak with hot galvanized bases. Skatshoven, Grijthuis.

## Wood – a living material

The wooden components of our furniture are made from teak, pine or South American oak and are always of the highest quality. This allows our furniture to age gracefully, even gaining in beauty when used frequently. Just like any other living material, the wood is affected by humidity levels, direct sunlight and more. If you care for your furniture, you will be able to enjoy the lustrous wood finish for many years to come, even though kept outdoors.

**Not all pine is created equal.** Since our furniture is to be of the highest quality, we only use timber with standing annual rings in our pine furniture. This means that the annual rings are parallel to the short side, meaning no risk of the planks warping. This also ensures a harder product surface, meaning wooden components that better retain their shape and are less prone to cracking.

## We care about our trees

When buying one of our products, naturally you are entitled to know where the material comes from and how it was produced. This is why we work with certification and eco-labelling, enabling you to always track the material throughout the entire production chain, from raw material to finished product.

The wooden components of our furniture have environmental certificates from two leading organizations who share our view of responsible forestry. These certificates guarantee that the materials in the products you buy from us always meet high social and environmental standards:

### FSC®

Our teak and South American oak components are 100% FSC® certified by the Forest Stewardship Council®. The FSC works for the environmentally friendly, socially responsible and economically viable management of the world's forests. The FSC is an international organization with its members spanning various environmental organizations, social organizations and financial stakeholders. Look for the FSC label on our products.

### PEFC™

Our pine components are, with one exception\*, PEFC™ certified by the Programme for the Endorsement of Forest Certification. PEFC is an international organization with its members comprising various forest companies. The organization works to promote sustainable forestry with a focus on environmental, economic and social aspects.

\* Sofa 5 cannot yet be supplied with PEFC™ certification due to technical aspects of the production process, although we are working to remedy this.

# Our products

## CLASSIC SERIES

Furniture in the Classic Series, and especially Armchair A2, is for many of us synonymous with the Swedish summer at its best. Feel how the comfortable spring in the chair affects both the senses and the soul. Chairs that keep good company with tables and sofas, so you can enjoy them in any arrangement you care to make.

About our wood

The wood details in our furniture are in teak, pine or oak and are always of the highest quality. In this way, the furniture can be aged in the best way and even become more beautiful by frequent use. Like other living materials, the wood is affected by, for example, humidity and the sun's rays. If you take care of your furniture you will be able to enjoy the luster of the wood for many years, despite the fact that the furniture is outdoors. Read more about all our wood and how our unique pine is produced at [grynhtjan.net](https://grynhtjan.net)

Here at Gythyttan Stålnöbblar, we have a passion for timeless design and working with durable materials. Craftsmanship and professional pride have characterised all our work since the forge in Gythyttan first flickered into life in 1895. Back then, it was used to create horseshoes, axes and irons. The first A2 chair was produced in 1930, and Artur Lindqvist sold it with the slogan "When you buy summer furniture from Gythyttan, your furniture needs are solved for many years to come." A statement that still rings true today. On the right, you can see a small selection of the products we have created over the years.
