FRANCESC RIFÉ.

BEAM

aluminium

A collection of aluminum outdoor furniture with a design of marked architectural inspiration.

Its rectilinear cut and strong volumes gives it an elegant rationalist style, obtained from a studied set of slats and planes of different dimensions, whose calculated position generates a subtle graphic expression, as well as refined details that gives it identity and character.

Beyond its attractive presence, another of the great peculiarities of this collection of aluminum outdoor furniture is that it is available for personalization in the entire RAL color chart. In addition to the versatility that it implies when designing a space, this possibility also highlights the ability of the Beam collection to adopt a more neutral, sober, serene, or colorful, vibrant and carefree appearance.

Its perception changes a lot depending on the color or material of its structure, since Beam is available not only in aluminum, but also in Iroko wood.

*The generous depth of the seats
in the armchairs and sofas offers
great comfort, reinforced by a slight
inclination in their backrests.*

Furniture for future.

A modern outdoor lounge set is positioned on a curved wooden deck in a Japanese garden. The set includes a large sectional sofa with grey and beige cushions and a matching coffee table. The deck is surrounded by a gravel garden with rocks and a wooden fence in the background. The text is overlaid on the upper right portion of the image.

Its voluminous upholstery is made with acrylic fabric mass dyed, which prolongs color fastness. They are laminated fabrics and have heat-sealed seams, so they are waterproof and do not allow moisture to penetrate inside.

Furniture for future.

BEAM ALUM. COLLECTION	Reference	Description	Dimensions (piece / cm)	Weight (kg)	Pieces (/ Box)	Dimensions (Box / cm)	Volume (m³)	Weight (kg)
