**Honesty is the  
best policy.**

***Philosophy***

25 years of experience with garden furniture have inspired me to conceive my own design, pretty much like the locale village furniture maker in the old times.

No expensive publicity,  
no lavish showrooms,  
just drop by to try your new  
furniture in my garden.

**3**

***Buy from the source***

There are no secrets, the  
fewer mouths to feed in  
the distribution chain, the  
cheaper the product.

At cassecroute you buy  
direct from the producer  
and therefore also at a  
fair price.

You can also save on  
shipping if you pick up the  
table yourself. In addition,  
you will receive a set of  
professional petanque balls.

**ABOUT**

At cassecroute picnic tables  
and garden furniture are built  
- since 2008 - which will last for  
generations and which will be  
the joy of your grand children.  
Its wood, steel and aluminium  
are indestructible – its design  
is timeless.

**Sit together and  
enjoy each other's  
company in an  
unconventional, honest  
and affordable manner**

### ***Designers***

Wim Segers and Ronald Mattelé both have been developing garden furniture for years. Wim has designed several major classics and Ronald has put several furniture companies on the map.

Cassecroute is the result of a long maturing process, countless hours of philosophizing about yesterday and today, and about how people can be made to sit together and enjoy each other's company in an unconventional, honest and affordable manner.

## CASSECROUTE TABLE

The **cassecroute table** has established itself as a classic. Anyone who is fond of picnic tables will find it hard to get up from this table. There are no beams to climb over, you just sit down and let the party begin.

## The picnic tabel for socializing ...

You can also rest your back against the table top. You can rest assured, the table will not tip over: the **cassecroute table** is a solid and robust piece of furniture.

For those who like more comfort, you can place an easy chair on both narrow sides.

This picnic table is available in (untreated) iroko, concrete or aluminium (in white or any other RAL colour).

**Iroko:**

180 cm, 240 cm,  
300 cm, 360 cm,  
and 420cm  
(king size)

**Concrete:**

180 cm, 240 cm,  
300 cm

**Aluminium:**

up to 14 meter!

## LIGNO TABLO

**LIGNO TABLO**, Esperanto for 'wooden table', is made by hand from solid Iroko wood. Its design combines a superior degree of finish with an eye for detail that borders on the obsessive. To meet the demand for long tables, Cassececroute is introducing LIGNO TABLO in three different lengths: 3 metres, 3.6 metres and 4.2 metres.

ligno tablo

Classic, unique,  
non-conformist ...

29

As you'd expect from Cassececroute, custom table sizes are also an option. The elegant design language of LIGNO TABLO ensures that this table is not just ideal for outdoor use, but works just as well in most interiors. It is a timeless design; a true classic that adapts to all possible styles and tastes, but that still exudes the sense of uniqueness and non-conformism that has become Cassececroute's trademark over the years.

## CARRÉ

The **carré** is a square picnic table that seats 8 to 10 persons for eating and up to 12 people for chatting over a fine glass of wine. Sitting around the table makes for pleasant conversation, and take my word for it: the carré is ideal for lingering and socializing.

**Elegant, cosy and  
comfortable ...**

The four corners are each provided with an opening to facilitate seating. You can also place stools at the corners, thereby creating four additional seats. As with each piece of Cassecroute furniture, you can sit with your back against the table using it as a backrest.

22

carre

The table dimensions are  
144 cm x 144 cm and  
the overall size is  
236 cm x 236 cm  
in iroko  
(146 x 146 / 238 x 238  
in aluminium)

Aluminium tables are  
available in any RAL colour.

## LA GRANDE RONDE

Sitting together around a table although a common cliché it is such an obvious truth!

Sitting together, chatting, enjoying a game of cards, good food and drinks at **La Grande Ronde** is pure enjoyment.

Sitting together,  
chatting and enjoying ...

Powdered steel and aluminium in all colours.

Cushions are available in foam and coating.

## BEER TABLE

The Beer Table is a party table at which you can stand or sit at bar height. Parties, aperitif, walking dinner or just enjoying dinner together.

beer table

**Parties, aperitif,  
walking dinner or just  
enjoying dinner together.**

59

The Beer Table is 110 cm high, with an 80 cm seating height. It is available in all Cassecroute sizes. As with each piece of Cassecroute furniture, you can sit with your back against the picnic table using it as a backrest. Let's Party...

## FIELD KITCHEN

The Field Kitchen is a piece of furniture that you set up in early spring and that can afterwards be used as an indoor table.

It can be fitted with the Cassecroute top mounted tap and/or the ceramic water bowl designed by Roos Loeckx. Cooking is done on a hot plate, in a tajine or on a top mounted BBQ. No built-in but top mounted components for optimal flexibility and multifunctionality...

Enjoy the simple  
things in life ...

300 cm, 360 cm,  
and 420 cm  
(king size)  
Height: 90 cm

## BENCH

The Bench is a free standing bench in different sizes. An invisible piece of furniture, it is perfect when standing against a house wall, by a tree, in the kitchen, garden or somewhere in the yard.

Bench 180 cm fits the head of the Cassecroute Table because the dimensions are identical. When you have a large number of guests, you just pull the Bench up to the table. Like all Cassecroute furniture, the bench can be orderd in iroko or aluminium. Did you know that there are people who collect benches...

**A perfect piece of  
furniture at any  
place...**

# INFO

## Cassecroute picnic tables are available in different lengths\* and materials

### WOOD

- Wooden picnic tables are made up to 420 cm.
- The supports of the wooden tables are also available in any RAL colours.

#### IROKO

The tables can be orderd in untreated natural wood, oiled wood or in aluminium (95% recycled). The wooden furniture is made of iroko. Iroko is a tropical hardwood from Africa, which we officially purchase in accordance with ecologically sustainable practice.

Durability class: 1-2, same as teak.

Areas of application: shipbuilding, solid cabinets and outdoor carpentry work.

To protect the metal frame, the table is mounted on a solid core base.

The beams are predrilled to prevent the wood from splitting. Stainless steel screws and bolts to prevent corrosion and rust marks are obviously included.

The metal base is made of electrolytically galvanized steel with polyester powder coating. Here, too, a fully ecological process is used by a manufacturer committed to sound social practices.

## ALUMINIUM

The aluminium collection, comprising the cassecroute table, beer table, field kitchen and bench, is available in lengths up to 14 m.

- Aluminium tables are built up to 14 m!
- Aluminium tables are available in any RAL colour.

The beams are made of 95% recycled aluminium. They are subsequently coated in the four basic colours selected by Wim Segers and Ronald Mattélé. The cassecroute collection still has a warranted lifetime of

three to four generations, and remains fully recyclable. The base is still made of metalised steel and powder coated in different colours.

Not a single tree is felled for the production of each aluminium Cassecroute table.

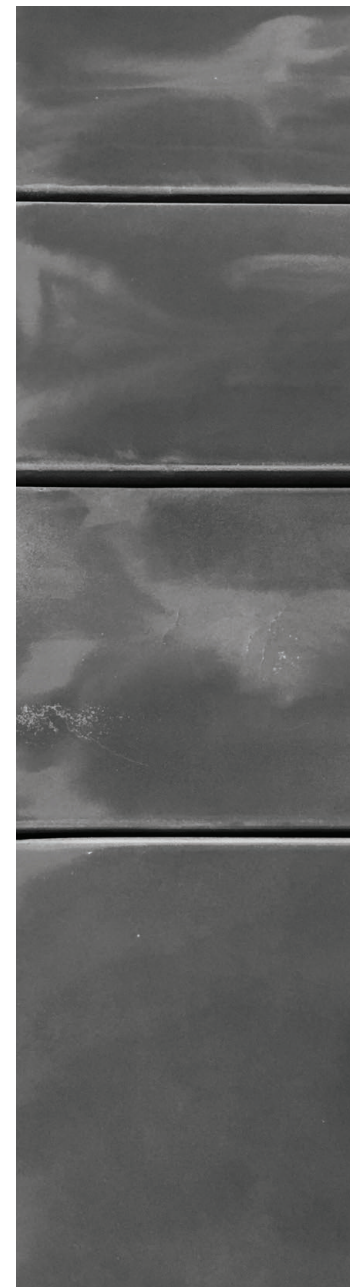

## CONCRETE

Concrete is timeless, strong and pleasantly warm after some sun rays.

All products with 20 cm beams are also available with concrete beams.

Next to the cassecroute table, the beer table, carré, field kitchen and bench can all be built to order with concrete beams.
